RESEARCHERS IN MOTION

**EURAXESS Worldwide**

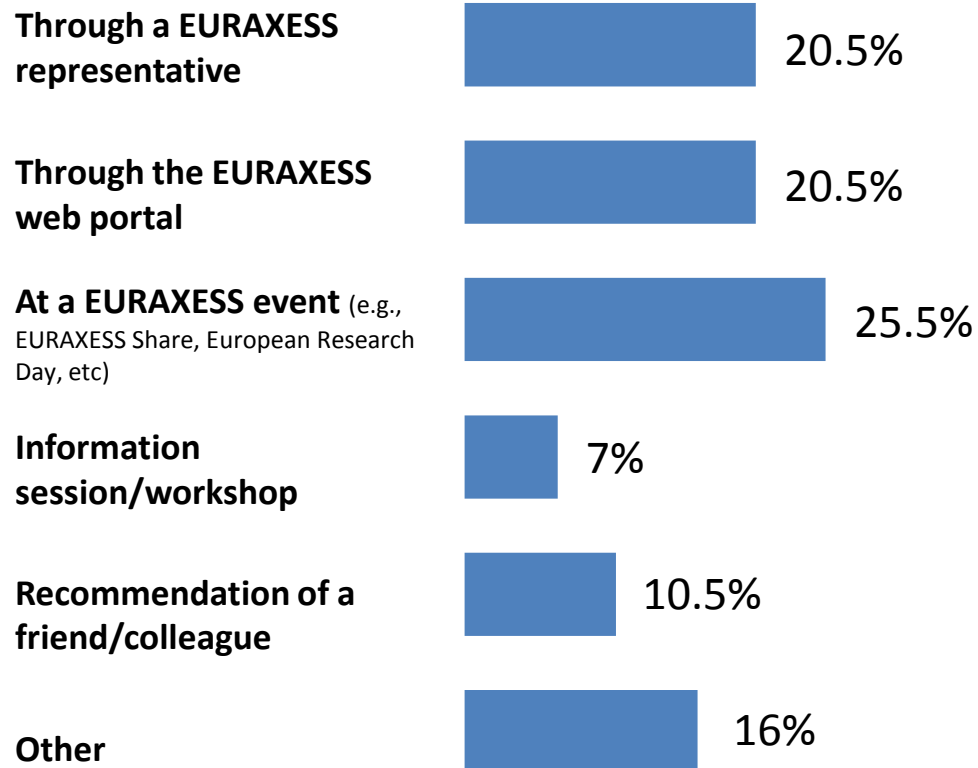

**Satisfaction Survey 2015**

**Results**

# When did you join EURAXESS Worldwide communities?

# How did you become aware of EURAXESS Worldwide?

# How useful do you find EURAXESS Worldwide services?

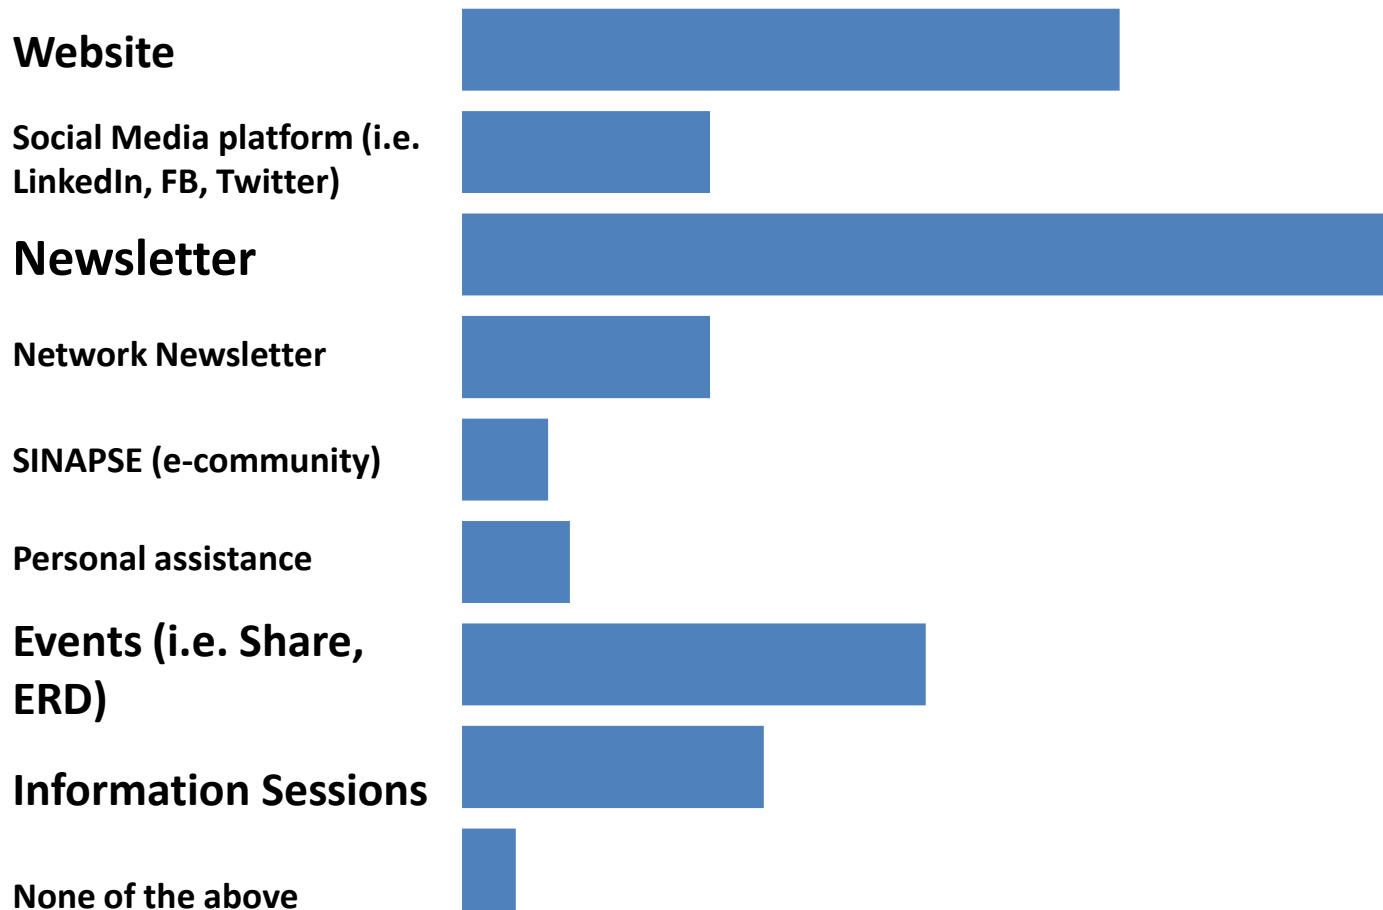

all values in %

\*n/a answers not included in graph

# Which EURAXESS Links offering do you use?

# How can we improve?

I do not always open the newsletter - I think having to click on a link or open a pdf to access the content is not an incentive in our busy world. [...] it would be great if the **content could be displayed directly into the email.** That would greatly improve my use of the EURAXESS resources. Great job otherwise. Good luck!

Possibly **match** research interests of potential candidates **with researchers in Europe**

**Enable the members** of specific communities (e.g., as in my case, Marie Curie fellows) to be **put in touch** according for instance to **their geographical location**

It could be more **to the point**. Often the actual procedure of getting the schemes becomes **non-understandable** due to the technicality of the words..

Actualize offerings - **clarify how exactly EURAXESS can be used.**

Eg need more info, transparency, examples, faces of propped involved etc etc

**more face to face** opportunities in local area/country more **help for writing funding applications while out of Europe**

Perhaps focus more on **specific target audiences** rather than everyone?

There is so \*much\* information available in the newsletter that I find that I **can't process all of it.**

**Thank you for giving us your opinion!**  
**We'll work on improving our services to you!**
